

Free Solar & Battery Installation

Save on your church's electric bill

Your church at the heart of community sustainability

- Energy provided to the church at \$0/kWh; government subsidy (SREC) pays for the system.
- The construction will repair roofs and ancillary improvements.
- Uninterrupted electrical power during city-wide black-outs: the battery will enable lights, wifi, refrigeration, and some air conditioning on the property to continue to run.

Rooftop-Solar and Battery System

- » Dramatically lower electricity costs.
- » No upfront cost, and some roof and electrical system upgrades included.

Resilient Community Shelter

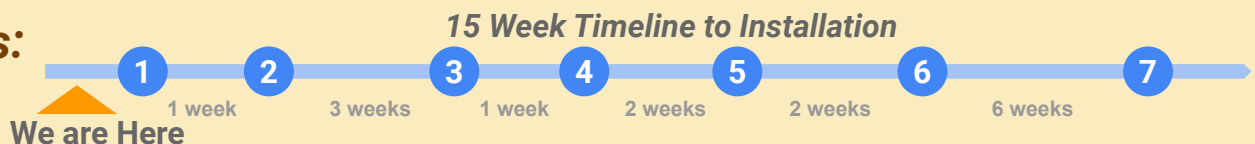

- » Place of refuge for disasters or blackouts.
- » Retain lights, internet, freezers, and other functions critical for community needs.

Significant Sustainable Impact

- » A 12kW system offsets 220,000 lbs of CO₂.

The Process:

The Steps:

1. Share Data
2. Initial Design
3. Site Visit
4. Confirm Design
5. Sign Agreement
6. Receive Permit
7. Install
